

FOR SHOOTING RANGES AND PROFESSIONAL USERS

TACTICAL TARGET SYSTEM

Modular target system for professional training

One system for repeated training. Refresh the surface with spray paint, replace the worn body and keep using the serviceable steel stand.

01 Refresh the surface with spray

Simply cover visible impact marks with spray paint to restore the surface appearance.

02 Replaceable body

Replace the worn rubber body with a new one. Retain the serviceable steel stand.

03 Continue training

After replacement, fit the body to the stand and check the system as instructed in the manual.

Rubber body + dismantlable steel stand

3 000

rounds fired during testing

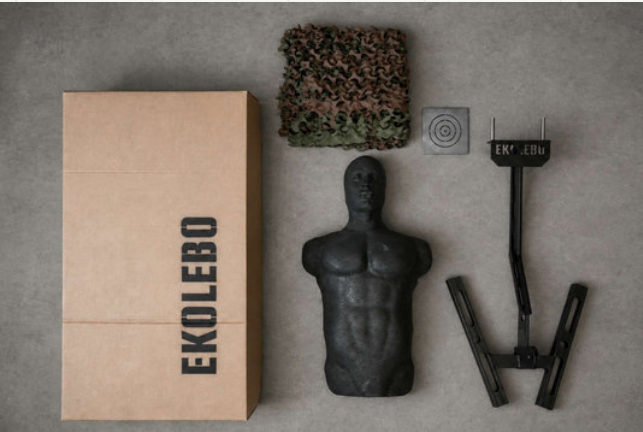

9×19 mm FMJ / 124 gr / 10 m

The front silhouette remained functionally recognisable.
Result of a specific test; details in the test appendix.

A PRODUCT BY EKOLEBO S.R.O.

Know exactly what you are ordering.

The EKOLEBO modular system consists of a rubber body, a dismantlable steel stand and accessories. Replacement bodies are ordered separately, without a stand.

Actual system and accessories. Package contents are listed on the right.

Complete set contents

- rubber target body
- disassembled steel stand
- 2 bolts with nuts and an Allen key
- camouflage net, approx. 1 × 1 m
- steel stencil for spray marking
- 2 spare mounting spikes
- shipping packaging and printed manual

Technical specifications / model MTS-01

Target body	approx. 96 × 53 × 15 cm; approx. 19 kg
Body material	SBR rubber granulate + PU binder + pigment
Stand	S355 steel; approx. 12.5 kg; height approx. 90 cm
Stand finish and plate	powder coating; removable ARMOX plate with EKOLEBO logo
Shipping packaging	approx. 103 × 55 × 30 cm
Packaged complete set	35.5 kg
Camouflage net	approx. 1 × 1 m

The 35.5 kg weight includes the entire shipment, accessories and packaging.

Replaceable parts: rubber body and mounting spikes. Use original parts or parts approved by the manufacturer.

EKOLEBO S.R.O. / SLOVAKIA

Manufacturing, delivery and results.

Actual EKOLEBO rubber bodies in production.

300-500

units per month / production capacity

1-3 days

dispatch of complete sets in stock

1-3 days

dispatch of replacement bodies in stock

We dispatch complete sets and replacement bodies in stock within 1-3 working days of receiving payment. For items not in stock, production usually takes 1-3 working days; we confirm dispatch according to current production and any constraints. Bulk order schedules are agreed in the quotation.

3,000 rounds fired. Documented results.

Front view

Rear view

9×19 mm FMJ / 124 gr / 10 m / 8 April 2026

After a test involving 3,000 rounds, the front training silhouette remained functionally recognisable. The greatest damage occurred on the rear exit side.

Rounds fired; confirmed hits were not counted separately.

5.56×45 NATO Frangible: separate photographic documentation reports 50 hits.

Manufacturer's technical record of a specific test, not certification or a service-life guarantee. Conditions and photographs: Tests and Photographic Documentation.

REPEATED USE

Refresh the surface. Replace the body. Continue training.

Spray paint restores surface appearance; it does not replace lost material or restore the body's mechanical service life. Replace worn parts and retain the serviceable stand.

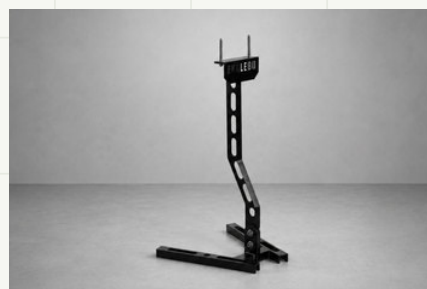

Refresh with spray paint

Simply cover impact marks with spray paint. Work in a ventilated area following the paint manufacturer's instructions.

Replace the worn body

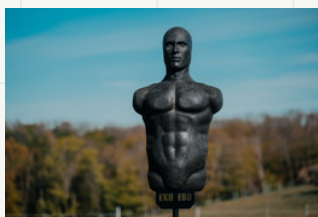

A new rubber body renews the system without buying another complete set. Retain the serviceable steel stand.

Keep using the stand

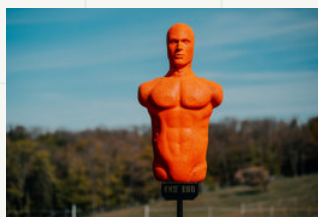

After replacement, assemble as instructed in the manual and check completeness and stability before further use.

Four colour options

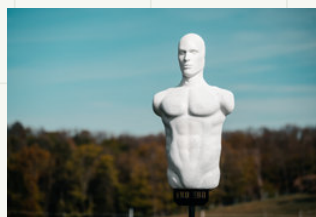

Dark Green Tactical

dark green finish

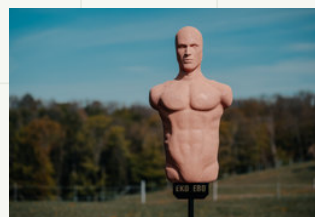

High Visibility Orange

orange / RAL 2004

White Spray Reset

white / RAL 9016

Human Tone

human skin tone / RAL 3012

The quotation specifies the selected finish and its availability. Photographs are for guidance; the colour specification defines the exact shade.

Documented testing

9×19 mm: test record covering 3,000 rounds. 5.56×45 NATO Frangible: separate photographic documentation reports 50 hits.

The separate Tests and Photographic Documentation appendix provides conditions, results and limitations.

DIRECT FROM THE MANUFACTURER

Order a complete set. Or a new body.

Complete set

Body + stand + accessories

999 EUR incl. VAT

Shipping included subject to shop terms; destination coverage confirmed in the quotation.

Replacement rubber body

Body only, without stand

599 EUR incl. VAT

Shipping for a separate body is confirmed in the quotation.

Retail prices include VAT. For international deliveries, the quotation specifies the price and applicable VAT treatment.

Order in the online shop

Choose a complete set and colour. For multiple units, send the quantity, colour, country and postcode.

Conditions of use

Use only at a suitable shooting range in front of an approved bullet trap. The target does not replace a bullet trap or ballistic protective barrier.

Fire only at the designated front surface of the rubber body. Avoid steel parts, logo plate, edges, spikes and joints; no side, rear or steeply angled fire.

The range operator approves ammunition, minimum distance and conditions in line with the manual. AP, steel-core/penetrator, incendiary and tracer ammunition are prohibited; do not use unapproved high-velocity ammunition.

Wear eye, face and hearing protection. Stop use if unstable, damaged or if unusual ricochets occur. Indoor use is subject to the manual's specific conditions, including approval of targets with steel parts.

The full manual is available on request and included in the delivery. Read it before testing and use; this summary does not replace it.
